

GreenLight HPS

on a per-case basis

ForTec Companies now offers the GreenLight HPS for the treatment of BPH and other urologic conditions. The 532nm wavelength along with advanced laser technology make the GreenLight HPS safe, effective and efficient. With over 375 clinical papers and abstracts supporting the safety and efficacy, you can feel confident you are providing the best solution for your patients' urological needs.

The ForTec Advantage

Latest Innovations

Access to the latest advances in medical technology

Flexibility

Technology when you need it with ForTec's live scheduling 24 hours a day, seven days a week

Cost Effectiveness

Elimination of capital expenditure, equipment maintenance and equipment obsolescence

 **GreenLight HPS™**
High Performance System

Specifications

Laser: Diode-pumped solid state

Wavelength: 532nm

Power: 120W

Dimensions: 46.3" (H) x 18" (W) x 33" (D)

Weight: 335 lbs.
